

## TOWERS FOR USERS

### Learn to work safely with towers

**Gulf test safety consultancies**, is an approved PASMA training centre, and leading the way in creating and delivering **PASMA** towers for users course.

The PASMA training scheme operates to the highest practice standard and is the benchmark scheme for the industry. Training thousands of operators every year through approved training center such as ours in Al Quoz, Dubai.

### AIM AND OBJECTIVES

PASMA Towers for Users will equip you with the expert knowledge necessary to work safely with mobile access towers, as well as the skills to properly assemble, use, dismantle, alter, move and inspect mobile access towers.

### COURSE OVERVIEW

This PASMA Tower for Users Training course can train up to 12 on each course. Through a combination of theory and practical work, you will learn about:

- Introduction to mobile access towers.
- Work at height responsibilities of employers, employees and suppliers
- Standards affecting the manufacture and use of mobile access towers
- When it's safe to use a mobile access tower, and when it's not.
- Carrying out pre-use checks and post-assembly inspections on mobile access towers and use of PASMA Inspection tags.
- Assembling and dismantling a mobile access tower using approved methods
- Moving a mobile access tower.
- Identifying hazards in the work environment
- Practical test including assessment.

**COURSE DURATION : 1 DAY**

**LOCATION : GTSC Training facility,  
AL QUOZ, DUBAI**

### Is this the right course for me ??

This course is suitable for anyone who will be using mobile access towers at home or at work, including:

- Those who have never used towers before.
- Those who already use towers but have never been formally trained.
- Those re-taking the course after an earlier qualification expires.

This course is designed for operatives.

# TOWERS FOR MANAGERS

Know what 'Good' looks like

## Is this the right course for me ??

This course is aimed at people who don't use towers themselves, like site managers, safety professionals and company directors. It's suitable for anyone who manages or supervises tower operatives, including:

- Those new to managing tower users
- Those who already manage tower users but have never been formally trained
- Those re-taking the course after an earlier qualification expires.

## COURSE OVERVIEW

Through a combination of theory and group discussions, you will learn about:

- Work at height responsibilities of managers
- Standards affecting the manufacture and use of towers
- Where to find crucial safety information
- When it's safe to use a tower, and when it's not
- Different tower configurations
- Identifying hazards in the work environment
- Risk assessments
- Rescue plans
- Carrying out pre-use checks and post-assembly inspections on towers
- The components used in a mobile access tower
- Good practices for the safe use of mobile access towers
- Behavioural competencies
- Preventing personal health hazards

## Spend one day at our approved PASMA training centre with our expert instructor and go back to work knowing:

How to safely assemble, dismantle, alter and move mobile access towers.

How to safely use mobile access towers.

How to inspect mobile access towers.

How to identify hazards relating to their use

What legislation, regulations and guidance are applicable to these towers.

If you're new to towers or tower training, Towers for Users is the ideal starter course.

If you manage or supervise operatives, look at Towers for Managers instead.

## Certification & Grants

On successful completion of a PASMA training course all delegates receive a digital Certificate of Competence and virtual card which are recognized by The Health & Safety Executive and valid for three years. The Card shows the categories that the operator has been trained in and it features the holder's photograph.
